带表内卡规主要用于工件内径，环形槽底及台阶孔径等的测量，可完成其它量具无法完成的特形孔的测量。

The inside dial caliper gauges are attachment to the dial indicator and used for measuring inside diameter, ring groove bottom diameter and inside step diameter or holes of the workpieces.

带表外卡规主要用于工件外径，环形槽底外径工件特殊部位厚度等的测量，可完成其它量具无法完成的特形零件的测量。

The outside dial caliper gauges are attachment to the dial indicator and used for measurement of outside diameters, ring groove bottom diameter, narrow grooves and hard to reach dimensions.

- 测量范围大于395mm以上的带表内卡规，可根据用户要求特殊加工。
- 测量范围大于95mm以上内卡规配防震百分表
- The inside dial caliper gauges with measuring range over 395mm can be made upon request.
- The inside caliper gauge match with shock-proof dial indicator above 95mm of measuring range.
